

The Instructions to Tenderers for Works (ITT-W) procured using the **Open Procedure** are now amended to operate with the recently published Suitability Assessment Questionnaires (28/07/2023). Some minor amendments have also been made for language consistency across the ITT-W suite.

Contracting Authorities should familiarise themselves with the amended ITT-Ws and ensure that they are issuing the most recent version of the applicable documents for any tender.

Please refer to the table below to note amended documents:
